

Wheeled Jaw Training

Presented by MPP Aftermarket

Peterborough, ON Canada

TRAINING AGENDA

DAY ONE | 8:00am to 4:30pm

- **Welcome & Safety:** Introduction to the course, training objectives, housekeeping items, safety expectations, and emergency procedures.
- **Plant Layout & Major Assemblies:** Gain a comprehensive understanding of the Lippmann Wheeled Jaw Plant, including overall plant design, operating principles, vibrating equipment, and conveyor systems.
- **Jaw Crusher Fundamentals:** Explore jaw crusher components, parts identification, lubrication requirements, operating procedures, and maintenance best practices to maximize performance and uptime.
- **Peterborough Facility Tour:** Tour the Peterborough manufacturing facility to see equipment assembly processes, production operations, and Lippmann products in various stages of construction.

DAY TWO | 8:00am to 4:30pm

- **Plant Electrics:** Review the electrical systems, controls, components, and troubleshooting procedures used on Lippmann jaw plants.
- **Plant Hydraulics:** Explore the hydraulic systems that power key plant functions, including operation, maintenance, and troubleshooting best practices.
- **Local Site Visit:** Gain firsthand insight into real-world plant operation and applications through a local site visit. Additional details will be provided closer to the event.
- **Linings & Wear Materials:** Learn about Lippmann jaw dies, wear components, material selection, wear patterns, and maintenance considerations to maximize performance and uptime.
- **Course Wrap-Up & Q&A:** Conclude the training with an open discussion, review key takeaways, and address any remaining questions regarding Lippmann Wheeled Jaw Plants.
